**Job Title: Quantitative Developer Intern**

**Location:** Singapore

**Job Type:** 6-month internship, full-time

---

**About Alphien SAS:**

Founded in 2018, Alphien is a Fintech which has developed a research platform for quantitative finance. We connect our community of users with the financial industry by hosting competitions on our platform. On the other hand, we offer investment managers the possibilities to sponsor competitions and find investment strategies. Alphien is headquartered in Paris and has operations in Singapore as well.

**Your mission**

- Learn, enhance and develop the proprietary Quantitative R-based Library of the platform.
- Develop models and evaluation methods in order to assess the quality of the research done on the platform by its users.
- Data science research in order to create alternative data to be further available for the research community.
- Develop tools with the back-end IT developers to facilitate quantitative research on the platform.

**Your profile**

- Degree in Mathematics, Statistics, Computer Science or related highly quantitative fields
- Proficient in R programming
- Strong software engineering skills and adaptability to new technologies
- Interest in financial markets; knowledge in option theory is a plus
- Attention to detail and strong personal organizational skills
- Highly motivated, self driven with an entrepreneurial outlook

**What we offer:**

- Join a young and dynamic team in a disruptive sector
- Participate in different projects related to our platform development
- Be part of an inspiring job environment in a growing fintech startup

**Application instruction**

Please send a copy of your resume and a cover letter to [careers@alphien.com](mailto:careers@alphien.com) with “Application for Quantitative Developer Intern” in the subject.
