

# ALPHIEN

Address: 6 rue de la Trémoille, 75008, Paris, France

Website: [www.alphien.com](http://www.alphien.com)

**Job Title:** Quant Developer Intern Specialised in Data Science

**Location:** Paris

**Job Type:** 4 to 12-months internship. Possibility of a full time position afterwards.

---

Founded in 2018, Alphien (SAS with a capital of 1.75 Mio Euros) bridges the gap between asset managers looking for a strong quantitative exposure, and brilliant minds with knowledge and experience to design investment indices originals. Building on the combined decades of experience of our management team, Alphien disrupts the field of data science applied to finance. We are headquartered in Paris and also have operations in Singapore.

**Mission:**

- Understand and improve the quantitative strategy development environment of the Alphien community.
- Improve the user experience on the Alphien platform
- Check the technical content and application of this content in the field of quantitative finance.
- Creating examples of simple strategies for educational purposes for the community and present the most advanced features of the platform.

**Prerequisites:**

- Graduate or student at a major engineering school or university in a branch useful to the mission.
- Startup spirit, commitment and team spirit, have initiatives.
- Rigorous, methodical and able to work with an international team.

**Conditions:**

- Contract: internship
- Start date: Immediate, Duration of the internship: 4 to 12 months.
- Remuneration: between 700 - 1500 € / month according to qualifications and duration of the internship.
- Possibility of CDD and stock options at the end of the internship.
- Location: Paris (6 rue de la Trémoille).

**Application:**
